

Scheduled Maintenance Program

Regular Maintenance of your critical production equipment can help prevent revenue-threatening down-time, machine fatigue, and costly emergency repairs. Protect your investment by creating an on-site maintenance plan that fits your needs and that is convenient to your production schedule.

Don't wait until it's too late!

PERFORMANCE

Proactive maintenance, rather than reactive repairs, will keep your machinery running efficiently, and can extend the life of your machines.

PRODUCTIVITY

Downtime associated with machinery failures can significantly impact production schedules critical to customer relationships as well as to your bottom line.

PROFITABILITY

With regularly scheduled maintenance, you can mitigate unexpected schedule interruptions to meet on-time production demands and enhance profitability.

Schedule service when you DON'T need it!

Service your machines on your terms, before emergencies happen. Contact us today to assess the condition of your machinery and potential threats to your production. Let our expert service team create a custom maintenance program tailored to your specific needs, including a preliminary service plan for each machine you choose to include in the scheduled maintenance program.

Program includes benefits such as:

- Discounts on customized quarterly maintenance visits
- An annual report on the service history and future service recommendations for each machine included
- Reminders when it is time to schedule

Scheduled maintenance may include:

- Visual inspection of parts such as forming rolls, guards, belts, chains, hydraulic and pneumatic valves, cylinders, fittings, conduits, filters, etc.
- Basic cleaning & lubrication
- Minor adjustments & repairs day of planned visit (parts not included)
