- Installations and in-shop training \*
- Productivity and through-put solutions
- Machinery capital investment advisement
- Custom paint services
- Machinery Electrical Conversions
- Mobile-machinery mounting
- Shop relocation assistance

\*Select brands and models\*

Preventative Maintenance plans are designed to help you maintain your equipment for regular optimal performance. Plans do NOT include "Urgent" or emergency visits, and must be scheduled at least 14 days in advance, pending availability. Plan pricing does not include non-warrantied replacement parts, consumable parts, costs of external services such as blade sharpening or forming roll resurfacing, or return visits to install parts ordered during scheduled maintenance visits. Daily visits include eight hours TOTAL, including one and a half hours of travel and 100 miles radius from customer's nearest service portal. Our technicians will perform maintenance on as many machines as reasonable within allotted time, and customer should prioritize accordingly. Pending availability, technician may be able to stay longer than the allotted time to service additional machinery, but in these cases, labor hours exceeding six and a half hours, travel hours exceeding one and a half hours, and mileage exceeding 100 miles will be billed at current service rates.

\$1350

**ANNUAL:** Single Day (\$1450+ Value)

Provides one day of service within a 12-month period. One and a half hours travel and mileage within 100 mile radius of the customer's service portal is included. \*Additional travel and mileage charges portal to portal outside travel allowance will be billed separately at current rates\*

\$2700

**BI-ANNUAL:** Two Days (\$2900+ Value)

Provides two days of service within a 12-month period, with one scheduled visit every six months. One and a half hours travel and mileage within a 100 mile radius of the customer's service portal is included. \*Additional travel and mileage charges portal to portal outside travel allowance will be billed separately at current rates\*

\$5400

**QUARTERLY:** Four Days (\$5800+ Value)

Provides four days of service within a 12-month period, with one scheduled visit every three months. One and a half hours travel and mileage within a 100 mile radius of the customer's service portal is included. \*Additional travel and mileage charges portal to portal outside travel allowance will be billed separately at current rates\*

**CUSTOM:**

Fully customizable plan for larger shops requiring more than four days of scheduled maintenance annually.

**WE WANT YOUR MACHINE!** We may buy your used metal fabrication machinery for cash, credit, or trade! Offers are not guaranteed, and depend on condition, age, make, and model.

Preventative Maintenance program begins the date of first scheduled service, for a duration of twelve months. Payment in full is due at the date of first service. PM visits will be automatically scheduled according to plan frequency with periodic reminders of service dates.
